Art Unit: 3762

## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1-24, 28 and 36-46 are allowed.

The following is an examiner's statement of reasons for allowance:

The system and methods for using near and far field communications according to a duty, or using near and far field transmissions for storing data in the memory of an implantable medical device as claimed are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Turcott (US 6,527,729) disclose using a duty cycle to conserve energy; however, there lacks a teaching to use the duty cycle with near field wireless communications.

The references Goedeke et al (US 6,263,246) and Barreras (US 5,807,397) cited in the PCT Search Report were previously considered and fail to render obvious the features of using a duty cycle, and near and far field communications as claimed in the present application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (571) 272-4952.
